Profile

An ambitious man eager to take the initiative and put things in motion. Passionate about the world of web / mobile developing.

I am currently a full stack developer with an experience of 3.5 years of experience mostly on React / React Native, NodeJS (expressJS, GraphQL with apollo-server) and MongoDB/mysql.

I use my expertise, skills and passion to design and implement high-quality software solutions for online business globally.

Drop me a message if you think my expertise could help you organization!

Professional Experience

Full stack developer, Cognizant Mobility Romania

01/2023 – present | Timisoara, Romania

We automate the processes of our clients. The main client is a major player in the German automotive industry.

As a technical lead for my team, I am actively doing:

- Technical developing
- Team Mentorship
- Client Communication
- Business Logic Alignment
- Continuous Improvement

I have been working on similar projects mainly with the MERN:

- React / React Native / nodeJS / graphql / MongoDB and AWS

Full stack developer, Endava Romania

05/2022 – 01/2023 | Timisoara, Romania

Developed web applications for a Nordic bank.

09/2020 – 04/2021 | Timisoara, Romania

Education

Master's degree: IT Systems Applied in Production and Services, Politehnica University of Timisoara

2022 – 2024 | Timisoara, Romania

Bachelor's Degree in Computers and Information Technology, Politehnica University of Timisoara

2018 – 2022 | Timisoara, Romania

Faculty of Automation and Computers, Department of Computers and Information Technology.

Final Project:

Expense tracker app with AI functionality which turns photos taken on tax receipts in app expenses.(developed with an OCR API) More than that , you can see your expenses based on the selected month, day and export this data as pdf. You have charts that describe how much you spend in comparison to the last month. A screen with an exchange rate of several currencies and another screen with your profile. This app was developed in React Native and Real Time DB Firebase.

Grade: 9.83 / 10.

Awards

iTEC competition edition 14, iTEC

03/2021

Second Prize for Artificial Intelligence.

Together with a college friend, we developed an application that reads all the prices of the products on a market shelf.
